01/08/2009

HOCHTIEF Facility Management has been commissioned to take over building services and the operation of hospital facilities for the SRH Zentralklinikum Suhl in Thuringia. The two companies have just signed a contract to this effect for an initial period of three years, beginning immediately. Both sides have agreed to maintain confidentiality regarding the volume of the contract.

The SRH Zentralklinikum Suhl is a hospital for cardiac, pulmonary and vascular medicine, oncology and diseases of the musculoskeletal system and the spine. It has more than 660 beds. It treats some 25,500 in-patients and around 36,500 out-patients a year. HOCHTIEF will integrate its services into the hospital processes and will in future be responsible for the complex technical building management in such fields as ventilation, air-conditioning, sanitation and water treatment. The Essen-based service-provider will also be in charge of pure steam generation, electrical engineering and instrumentation and will assume responsibility for cleanroom engineering in the intensive care units and surgical suites, and for operating the equipment which produces and distributes medical gases. HOCHTIEF Facility Management guarantees systems availability 365 days a year and will be on call on a 24/7 basis.

With this new contract, the company strengthens its position in the healthcare sector. In this field it already cooperates with - among others - the Sana hospital group and Frankfurt University Hospital.
