# HOCHTIEF to operate international training center for Lufthansa

### Facility management in exclusive convention hotel - Company responsible for maintenance of the building's geothermal energy system

HOCHTIEF Facility Management is to provide FM services for the newly erected Lufthansa Training & Conference Center in Seeheim in the federal state of Hesse. The exclusively fitted-out center, which has 483 rooms and more than 80 seminar and event units, will serve Lufthansa employees from all over the world coming here for training. It is one of Germany's largest convention hotels. Both sides have agreed to maintain confidentiality regarding the volume of the contract, which runs for a period of two years.

The HOCHTIEF subsidiary will be responsible for the maintenance and repair of the technical facilities in the conference, hotel and wellness areas. These include a geothermal energy system which provides the Lufthansa Training & Conference Center with environment-friendly heat. In addition, the FM service-vendor will provide support and assistance for the numerous events held in the center. These include courses in IT training rooms equipped with state-of-the-art media technology and large events in the 600-square-meter banquet room. With this new contract, HOCHTIEF Facility Management is extending its cooperation with Lufthansa: the company is already responsible for the Lufthansa Aviation Center, the airline's headquarters, the Flight Training Center and the Lufthansa bases in Frankfurt, Hamburg and Munich.
