### Technical operation of the Color Line and Volksbank Arenas - HOCHTIEF Energy Management optimizing energy costs

page 1  
02/16/2010

In Hamburg, HOCHTIEF Facility Management will be operating the multi-purpose Color Line Arena and the neighboring Volksbank Arena for a further five years. The company has just signed a contract to that effect with the client D+J-Arena Hamburg. It was agreed that no details of the contract volume would be disclosed.

HOCHTIEF Facility Management has already been ensuring the smooth technical operation of building installations at the Color Line Arena since 2002. One of its jobs is to prepare the 1,800 square meter ice rink for the ice hockey German league team Hamburg Freezers. Apart from being used for concerts, the Arena is also the venue for handball games played by the German league team HSV. The Volksbank Arena, directly adjacent, is an ice and ball sports training facility used by clubs and local individuals. Here the service provider is handling the maintenance and operation of the technical building installations. A contracting agreement has also been concluded: Sister company HOCHTIEF Energy Management will be sustainably optimizing the Color Line Arena's energy costs. "Since the Color Line Arena opened, we've been banking on HOCHTIEF as a reliable partner for the professional technical operation of the event facilities that we manage. We are very pleased that we can now expand on this successful collaboration," says Uwe Frommhold, general manager of the Color Line Arena.
